

rose to 600,612 cases in the last three years, reflecting a growth rate of 58%.

Demolition of unauthorized constructions: Unauthorized constructions on agricultural lands that were demolished up until August 2021 totaled 109,296 cases. During the Raisi government, this number rose to 244,824 cases, reflecting an increase of 87%.

Allocation of land for agricultural projects: During the second-to-last government and up until August 2021, a total of 714,366 hectares of national land were allocated for agricultural projects. In the previous government, this allocation increased by 12%, reaching 799,153 hectares.

Land allotment for production, industrial projects: One of the key projects undertaken by the Land

Affairs Organization of Iran is the allocation of land for production plans across various industries. During the penultimate government and up until August 2021, a total of 140,880 hectares of land were allotted for this purpose. However, under the Raisi government, the transfer of land in this sector increased by 12%, reaching a total of 150,891 hectares.

It is worth noting that in the realm of intelligent land monitoring, the technology to monitor and intelligently oversee the country's land was not in place until August 2021. Due to the efforts of the Raisi government, this capability has now been implemented across all 31 provinces.

Iran Fisheries Organization

Aquatic exports: This area has a high capacity for revenue generation and supplies the basic goods market with high-calorie items, it

is worth mentioning that in the calendar year of 1402, 210,000 tons of aquatic products were exported from the country, generating a value of \$650,000. Three years before in 1399 (ended March 20, 2021), this figure stood at 139,000 tons, equivalent to \$528 million.

Shrimp farming: The latest statistics from the calendar year of 1399 indicate that Iran had 15,000 hectares of shrimp cultivation fields, producing 48,000 tons of shrimp. Under the Raisi government, these figures have risen to 26,000 hectares, representing a 73% growth in cultivation fields and a 4% increase in production, yielding 50,000 tons of shrimp.

The relatively modest 4% increase in production, compared to the significant 73% increase in cultivation, can be attributed to the emergence of a disease affecting these marine animals. Specifically, acute hepatopancreatic necrosis dis-

Iran's late president Ebrahim Raisi (L) inaugurates the modern smart subsurface irrigation project of the Karoon Agro Industry Inc. in the southwestern city of Shoushtar on March 8, 2024.
